

# Glorifying Terrorism

## a typeface by Feòrag NicBhrìde

This font started off because I needed a couple of dingbats for a book I was laying out, then I got carried away. It features portraits of various terrorists and images related to terrorism. The book is *Glorifying Terrorism*, an anthology of original science fiction edited by Farah Mendlesohn. With an introduction by Andrew McKie of the Daily Telegraph, it features contributions by top UK SF writers Ian Watson, Gwyneth Jones, Ken MacLeod, and Charles Stross. The anthology highlights the flaws in recent UK government legislation that criminalizes ‘encouragement of terrorism’. You can buy a copy of it at <http://rackstrawpress.nfshost.com/>

Some of the people illustrated in this font were also chosen to highlight the flaws in the legislation. If you are wondering why I’ve included a particular respected world leader, religious figure, freedom fighter or champion of the underdog, it’s because their actions mean they could be considered to be those of a terrorist. See the next page for a list of glyphs and links to more information, where relevant.

This archive contains the TrueType version for the PC, which should be compatible with both Linux and Windows systems, and can also be installed under MacOS X, though there are Mac-specific versions of this font. You should have the following files:

- **About Glorifying Terrorism PC TT.pdf** - this file.
- **GlorifyingTerrorism.ttf** - the font itself. Please refer to the documentation for your OS for instructions on installing this font on your system. Sorry, I can’t help you—I don’t know anything about Linux or Windows. To install under MacOS X, simply double click the file to see a preview, then click the “Install Font” button.

Postscript Type 1 versions for the Macintosh and UNIX are also available, plus TrueType for the Macintosh.

## License and Notes

This typeface is licensed under the Creative Commons Attribution-NonCommercial-ShareAlike License. To view a copy of this license, visit <http://creativecommons.org/licenses/by-nc-sa/2.0/> or send a letter to Creative Commons, 559 Nathan Abbott Way, Stanford, California 94305, USA.

Note that the license includes the provision “Any of these conditions can be waived if you get permission from the copyright holder”. You already have my permission to *use* this font for commercial purposes, such as in a magazine or advertising, and do not need to ask (though a copy of whatever you used it for would be nice). If you wish to *redistribute* this font commercially, including on a website with paid advertising, you must still get my permission to do so and “you must make clear to others the license terms of this work”.
